

Source Verification Checklist

Source Verification Checklist

Use this before sharing planetary-defense or emergency information.

Check the source

- ? Is it from NASA/JPL, MPC, IAWN, ESA, NOAA, FEMA/Ready.gov, local emergency management, or another authoritative source?
- ? Is there a direct source link?
- ? Is the timestamp current?

Check the claim

- ? Is it a close approach, an impact probability, or an official alert?
- ? Does the source explain uncertainty?
- ? Are multiple official sources consistent?

Check the wording

- ? Is the language calm and factual?
- ? Does it avoid panic or exaggeration?
- ? Does it clearly separate education from official emergency instructions?

If unsure

Do not amplify the claim. Link to official sources and wait for confirmation.
